Headline metrics

Retrieval quality (top-1 cosine)	0.555	strong overlap
Retrieval quality (top-5 mean)	0.544	strong overlap
Generation faithfulness (cosine)	0.604	strong overlap

Latency: OCR 19.5s | retrieval 0.34s | generation 6.2s | total 30.2s

Note on scale: cosine similarity on L2-normalised sentence-transformer embeddings typically falls in [0.0, 0.8] for English text. Values above 0.5 are strong; values near 0 indicate no semantic overlap. Random pairs of unrelated English sentences embed to ~0.05-0.15.

Retrieval quality -- top-5 Branch Rickey hits

Rank	Cosine	Item
1	0.555	Branch Rickey Papers: Baseball File, 1906-1971; Scouting reports; 1962; B-K
2	0.551	Branch Rickey Papers: Baseball File, 1906-1971; Scouting reports; 1962; B-K
3	0.547	Branch Rickey Papers: Baseball File, 1906-1971; Scouting reports; 1962; B-K
4	0.540	Branch Rickey Papers: Baseball File, 1906-1971; Scouting reports; 1964; E-K
5	0.527	Branch Rickey Papers: Baseball File, 1906-1971; Scouting reports; 1963; T-Z

Interpretation: each row is one retrieved historical Branch Rickey report. Higher cosine = more topically similar to the input notes. A high top-1 with a sharp drop to rank 5 indicates the retriever is discriminating well; flat scores suggest weak signal in the corpus.

Daniel Jaster -2- Daniel is a well built athlete, with good coordination. Is active, alert. Has good delivery and can field his position. He has a corking move to first base; comes to a complete pause with his left knee and in the course of the delivery can throw either to first base or to th...

#5 cosine=0.527

April 10, 1963 St. Louis vs Mets WASHBURN, RAY With two and nothing on catcher Coleman in the first inning, Washburn came through the middle with a fast ball which Coleman hit back through the box. Washburn didn't follow his pitch in any respect. He was out of position to field any ki...

Generation faithfulness (grounding)

Cosine between the input transcription and the Claude-generated report: 0.604 (strong overlap). A higher score indicates the generated report stayed closer to the semantics of the original notes -- i.e., it was grounded in the input rather than drifting into generic baseball commentary.

Input transcription (Claude OCR output)

1st inning: Shows CRE and SMC with columns for R, H, E, L

4th inning: Shows CRE (9, 1, 0, 0) and SMC (4, 4, 0, 1)]

Generated report (the RAG output)

Summary

These notes document a game between CRE and SMC across five innings, with CRE leading 9-4 by the end of the fourth. The play-by-play includes hitting results, baserunning actions, and pitch counts, but lacks evaluative commentary on individual player performance or mechanics.

Actionable Recommendations

1. ****Address Makoa Sniffen's swing-and-miss tendency.**** Sniffen struck out swinging twice in this game (1-2 and 0-1 counts), suggesting he's aggressive early in counts and chasing pitches. Have your hitting coach review his pitch recognition and approach--specifically, get him to lay off breaking balls in early counts and improve his two-strike selectivity.
2. ****Develop Griffith, Tanner's baserunning aggression.**** Griffith advanced multiple bases on wild pitches and stole second base in the fourth inning, showing instinctive baserunning intelligence. Continue encouraging this--he's reading pitchers and taking chances effectively. Reinforce this as his identity on the basepaths.

Bonus Insight from the Branch Rickey Papers

Rickey's notes on Gary Kolb emphasize that raw athletic talent must be paired with **taught fundamentals**--specifically, Kolb needed to learn to run straight to first base and be "adventurous all the time." Your team shows similar raw capability (good contact, situational baserunning), but like Rickey would advise, these instincts need reinforcement through deliberate practice. The difference between a winning program and an amateur one is converting natural aggressiveness into disciplined, repeatable habits--not suppressing it.
